Notes to Editors:

About Vivoryon Therapeutics AG

With 20+ years of unmatched understanding in identifying post-translational modifying enzymes that play critical roles in disease initiation and progression, Vivoryon's scientific expertise has facilitated the creation of a discovery and development engine for small molecule therapeutics. This platform has demonstrated success by developing a novel therapeutic in type 2 diabetes. In its current programs Vivoryon Therapeutics is advancing its lead product, varoglutamstat (PQ912), in Alzheimer's disease and its entire portfolio of QC and QPCTL inhibitors in oncology and other indications. In addition, the Company pursues a development program for Mepirin protease inhibitors with potential therapeutic use in fibrotic diseases, cancer and acute kidney injury.
